[SAE PAPER 872403]
Aviation technology applicable to developing regions
[NASA-TM-89425] p 23 N89-10872
Aircraft technology opportunities for the 21st Century
[NASA-TM-101060] p 63 N89-12539

ZUMWALT, G. W.

Electro-impulse de-icing research: Fatigue and
electromagnetic interference tests
[DOT/FAA/CT-88/27] p 524 N89-22594

ZUO, L.

Analysis and control of unsteady separated flows
[AIAA PAPER 89-1018] p 417 A89-30528

ZUO, PEICHU

The research of 2-D flexible wall self-correcting wind
tunnel p 692 A89-46258

ZUPPARDI, GENNARO

An evaluation of three experimental processes for
two-dimensional transonic tests
[NASA-CR-181871] p 794 N89-27674

ZURINSKAS, THOMAS

Controller evaluation of initial data link air traffic control
services. Volume 1: Mini study 2
[DOT/FAA/CT-89/14-VOL-1] p 601 N89-24292
Controller evaluation of Initial Data Link air traffic control
services. Volume 2: Mini Study 2
[DOT/FAA/CT-89/14-VOL-2] p 661 N89-25986

ZURINSKAS, THOMAS E.

Evaluation of enhancements to the Low Level Wind
Shear Alert System (LLWAS) at Stapleton International
Airport [DOT/FAA/PS-88/14] p 56 N89-11356

ZVEGINTSEV, V. I.

Consideration of unsteady state effects during air intake
testing in a blowdown wind tunnel p 108 A89-14820
Quasi-stationary flow in blowdown wind tunnels
p 209 A89-21582

ZVEREV, O. V.

A study of shock wave radiation near models at
hypersonic velocities in air p 513 A89-38445

ZVIAGINTSEV, V. A.

Ensuring the quality of the covering surface in the case
of riveted joints with high radial interference
p 492 A89-34159

ZVULONI, RONI

Investigation of a small solid fuel ramjet combustor
p 544 A89-39028

ZWAAN, R. J.

Requirements and capabilities in unsteady wind tunnel
testing [NLR-MP-87066-U] p 85 N89-11716

ZWAN, ALLEN D.

Requirements and capabilities in unsteady windtunnel
testing p 339 N89-16878
Unsteady low-speed wind tunnel test of a straked delta
wing, oscillating in pitch. Part 2: Plots of steady and zeroth
and first harmonic unsteady pressure distributions
[AD-A201936] p 378 N89-19275

ZWAANENBURG, KOOS

Real-time flight simulation support for the X-31 aircraft
program [AIAA PAPER 89-3283] p 755 A89-48395

ZWAN, ALLEN D.

Structures for hypervelocity flight p 552 A89-36723

ZWANN, R. J.

A walk along interfaces
[B8817008] p 154 N89-14223

ZWEIFEL, TERRY

Sensor consideration in the design of a windshear
detection and guidance system
[SAE PAPER 881417] p 319 A89-28201

ZYWIEL, J.

The Honeywell/DND helicopter integrated navigation
system (HINS) p 308 A89-26741

ZYZYS, EDMUND

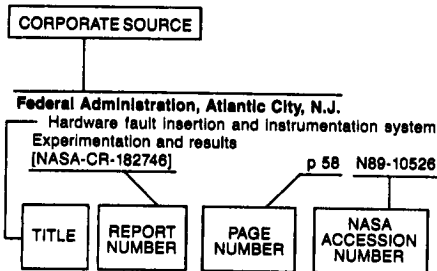

An operational demonstration and engineering flight test
of the Microwave Landing System on runway 22L at
Chicago's Midway Airport
[DOT/FAA/CT-TN88/42] p 601 N89-24291

CORPORATE SOURCE INDEX

AERONAUTICAL ENGINEERING / A Continuing Bibliography
1989 Cumulative Index

February 1990

Typical Corporate Source Index Listing

Listings in this index are arranged alphabetically by corporate source. The title of the document is used to provide a brief description of the subject matter. The page number and the accession number are included in each entry to assist the user in locating the abstract in the abstract section. If applicable, a report number is also included as an aid in identifying the document.

A

- ACA Industries, Inc., Torrance, CA.**
Parametric weight evaluation of joined wings by structural optimization p 228 A89-22817
- Academy of Sciences (USSR), Kazan.**
Studies in nonlinear aeroelasticity p 125 A89-15423
- Adiabatics, Inc., Columbus, IN.**
Analysis and test of insulated components for rotary engine
[SAE PAPER 890326] p 804 A89-51489
Adiabatic Wankel type rotary engine
[NASA-CR-182233] p 330 N89-17599
- Advisory Group for Aerospace Research and Development, Neuilly-Sur-Seine (France).**
AGARD manual on aeroelasticity in axial-flow turbomachines. Volume 2: Structural dynamics and aeroelasticity
[AGARD-AG-298-VOL-2] p 13 N89-10006
Computing Systems Configuration for Highly Integrated Guidance and Control Systems
[AGARD-LS-158] p 3 N89-10831
Reynolds number effects in transonic flow
[AGARD-AG-303] p 300 N89-16760
Energy Absorption of Aircraft Structures as an Aspect of Crashworthiness
[AGARD-CP-443] p 380 N89-18421
Full scale helicopter crash testing p 381 N89-18428
Software Engineering and Its Application to Avionics
[AGARD-CP-439] p 398 N89-18446
Validation of Computational Fluid Dynamics. Volume 1: Symposium papers and round table discussion
[AGARD-CP-437-VOL-1] p 422 N89-18610
Validation of Computational Fluid Dynamics. Volume 2: Poster papers
[AGARD-CP-437-VOL-2] p 424 N89-18648
The fatigue in aircraft corrosion testing (FACT) programme
[AGARD-R-713] p 548 N89-21873

- Application of Advanced Material for Turbomachinery and Rocket Propulsion
[AGARD-CP-449] p 548 N89-22654
Calendar of selected aeronautical and space meetings
[AGARD-CAL-88/2] p 566 N89-23361
AGARD highlights 88/2 p 566 N89-23403
Technical Status Review on Drag Prediction and Analysis from Computational Fluid Dynamics: State of the Art
[AGARD-AR-256] p 745 N89-26817
Measurement uncertainty within the Uniform Engine Test Programme
[AGARD-AG-307] p 776 N89-26854
Blading Design for Axial Turbomachines
[AGARD-LS-167] p 777 N89-27661
Special Course on Aerothermodynamics of Hypersonic Vehicles
[AGARD-R-761] p 823 N89-29306
- Aeritalia S.p.A., Caselle Torinese (Italy).**
Rapid prototyping of complex avionics systems p 770 N89-27657
- Aeritalia S.p.A., Naples (Italy).**
Joining of carbon fiber composite with fasteners p 343 N89-17701
- Aeritalia S.p.A., Pomigliano D'Arce (Italy).**
Validation of a multi-block Euler flow solver with propeller-slipstream flows p 373 N89-18649
- Aeritalia S.p.A., Turin (Italy).**
State-of-the-art of aircraft drag prediction in Italy by means of theoretical methods p 745 N89-26821
- AeroChem Research Labs., Inc., Princeton, NJ.**
Simultaneous computation of jet turbulence and noise [AIAA PAPER 89-1091] p 491 A89-33731
- Aerojet TechSystems Co., Sacramento, CA.**
CFD simulation of square cross-section, contoured nozzle flows - Comparison with data
[AIAA PAPER 89-0045] p 273 A89-25039
Incorporating general race and housing flexibility and deadband in rolling element bearing analysis p 561 N89-22912
Enhanced rotor modeling tailored for rub dynamic stability analysis and simulation p 561 N89-22916
- Aeronautical Research Inst. of Sweden, Bromma.**
Large-scale viscous simulation of laminar vortex flow over a delta wing p 374 N89-18660
- Aeronautical Research Inst. of Sweden, Stockholm.**
Estimation of the Equivalent Initial Flow Size (EIFS) distribution and prediction of failure probabilities for different parameter variations
[FFA-TN-1987-35] p 498 N89-20525
Compressible Euler solution around a wing canard sting configuration
[FFA-TN-1988-82] p 519 N89-22578
Wind tunnel tests of 16 percent thick airfoil section with spoilers at different chordwise positions
[FFA-TN-1987-39] p 520 N89-22582
The influence of the leading edge geometry on the wave drag for a 65 degree delta wing at low supersonic speed and small angles of attack
[FFA-141] p 520 N89-22583
Transonic and supersonic wind tunnel tests on control effectiveness on schematic missile configurations with canard controls
[FFA-TN-1988-11] p 531 N89-22601
Prediction of loads on wing/body/external store/lins pylon-configurations at transonic speeds
[FFA-TN-1988-44] p 532 N89-22602
A survey of poly-ether-ether-ketone and its advanced composites
[FFA-TN-1988-37] p 550 N89-22707
Wind tunnel tests of 16 percent thick airfoil with 30 percent trailing edge flap at high angles of attack and with flap angles
[FFA-TN-1985-58] p 823 N89-28500
- Aeronautical Research Labs., Melbourne (Australia).**
A potential theory for the steady separated flow about an aerofoil section
[ARL-AERO-R-176] p 13 N89-10005
Non-linear aerodynamic characteristics obtained from the analysis of flight-data
[AR-004-571] p 18 N89-10866

- Design of a new contraction for the ARL low speed wind tunnel
[ARL-AERO-R-171] p 116 N89-11755
Gas path analysis and engine performance monitoring in a Chinook helicopter p 327 N89-18602
Identification of dynamic characteristics for fault isolation purposes in a gas turbine using closed-loop measurements p 328 N89-18613
An examination of the fatigue meter records from the RAAF (Royal Australian Air Force) caribou fleet
[AD-A201074] p 395 N89-19290
Description of a simple rotor test rig and preliminary wake studies
[AD-A204089] p 541 N89-21808
Single channel test controllers
[AD-A204088] p 541 N89-22611
Modelling aircraft dynamics
[AD-A204086] p 607 N89-23448
Comparison of flow-visualised vortices with computed geometry over thin delta wings
[AD-A209083] p 621 N89-28489
Aerodynamic model tests of exhaust augmentors for F/A-18 engine run-up facility at RAAF Williamtown
[AD-A208110] p 641 N89-28518
Stresses and strains in a cold-worked annulus
[AR-005-548] p 666 N89-28671
Flutter calculations for a model wing using the MSC NASTRAN structural analysis program
[AD-A209244] p 824 N89-29318
Aircraft trajectory generation: A literature review
[AR-005-609] p 835 N89-29335
Incorporation of vortex line and vortex ring hover wake models into a comprehensive rotorcraft analysis code
[AD-A208036] p 835 N89-29336
A user's manual for the ARL mathematical model of the Sea King Mk-50 helicopter. Part 1: Basic use
[AD-A208058] p 835 N89-29339
A user's manual for the ARL mathematical model of the Sea King Mk-50 helicopter. Part 2: Use with ARL flight data
[AD-A208059] p 836 N89-29340
Identification of an adequate model for collective response dynamics of a Sea King helicopter in hover
[AD-A208060] p 836 N89-29341
A modified least squares estimator for gas turbine identification
[AD-A207911] p 842 N89-29348
- Aeronautical Systems Div., Wright-Patterson AFB, OH.**
An evaluation of ground collision avoidance system algorithm
[AD-A187831] p 91 N89-12580
Comparison of the general dynamics ground clobber algorithm with the GCAS and laws algorithms
[AD-A198479] p 157 N89-14226
Reconfigurable flight control: An opportunity for integrated diagnostics p 182 N89-14744
F-16 AI/VVI (Attitude Indicators/Vertical Velocity Indicators) evaluation: A comparison of four configurations
[AD-A199543] p 233 N89-15105
Ground collision warning system performance criteria for high maneuverability aircraft
[AD-A204390] p 523 N89-21779
An evaluation of the F/EB/EF-111 crew/voice message system
[AD-A205998] p 626 N89-23774
F-15E EADI (Electronic Attitude Director Indicator) evaluation: A comparison of three formats
[AD-A206809] p 769 N89-26846
Integrated avionics: Conceptual design p 769 N89-27654
- Aerospace Corp., El Segundo, CA.**
A method for calculating asymmetric flow through nozzles
[AD-A209689] p 807 N89-27992
- Aerospace Medical Research Labs., Wright-Patterson AFB, OH.**
Speech recognition in advanced rotorcraft - Using speech controls to reduce manual control overload p 24 A89-12404

Aerospatiale

- Specifications and measurement procedures and aircraft transparencies [AD-A209396] p 834 N89-28511
- Aerospatiale, Marignane (France).**
Control of on-board software p 398 N89-18452
- Aerospatiale, Suresnes (France).**
Tests of new materials with second generation carbon fibers, test report [REPT-47-188/F] p 550 N89-22702
CSPC test 319.30: Study on impact tolerance of prepregged carbon-epoxy systems [REPT-47-323/F] p 550 N89-22703
- Aerospatiale, Toulouse (France).**
Center of gravity control on Airbus aircraft: Fuel, range and loading [REPT-882-111-101] p 608 N89-23460
A330/340 hydraulic system [REPT-882-111-102] p 608 N89-23461
- Aerofstructures, Inc., Arlington, VA.**
Modal forced vibration analysis of aerodynamically excited turbosystems [NASA-CR-174968] p 425 N89-18696
NASTRAN supplemental documentation for modal forced vibration analysis of aerodynamically excited turbosystems [NASA-CR-174967] p 427 N89-19583
- Agusta Sistemi S.p.A., Tradate (Italy).**
Robust algorithm synchronizes mode changes in fault-tolerant asynchronous architectures p 433 N89-18475
- Air Force Academy, CO.**
Flight-test determination of aircraft cruise characteristics using acceleration and deceleration techniques p 25 A89-10101
- Air Force Aero Propulsion Lab., Wright-Patterson AFB, OH.**
Emerging hypersonic propulsion technology p 105 A89-13503
- Air Force Armament Lab., Eglin AFB, FL.**
Unsteady transonic flow using Euler equations p 375 N89-19245
A study of transonic drag reduction of a blunt cylinder by a cylinder probe [AD-A202557] p 458 N89-20965
Hypersonic prediction comparisons with experimental data for a cone-cylinder at mach 8.86 [AD-A207583] p 747 N89-27636
- Air Force Avionics Lab., Wright-Patterson AFB, OH.**
The evolution of digital avionics architectures/systems p 770 N89-27655
- Air Force Flight Dynamics Lab., Wright-Patterson AFB, OH.**
3-D composite velocity solutions for subsonic/transonic flow over afterbodies [AIAA PAPER 89-1837] p 582 A89-42065
Reconfigurable flight control: An opportunity for integrated diagnostics p 182 N89-14744
In-flight lightning characterization program on a CV-580 aircraft [AD-A203954] p 484 N89-20976
Aerospace structures design on computers [AD-A208811] p 811 N89-28321
- Air Force Inst. of Tech., Wright-Patterson AFB, OH.**
A computational study of coherent structures in the wakes of two-dimensional bluff bodies [AD-A198820] p 53 N89-11188
Determination of deflections of the vertical using the global positioning system [AD-A198680] p 90 N89-11729
Diminution and longitudinal splitting of carbon fibers due to grinding [AD-A198697] p 119 N89-11819
Application of linearized Kalman filter-smoother to aircraft trajectory estimation [AD-A194362] p 136 N89-12231
Structural optimization including centrifugal and Coriolis effects [AD-A198873] p 139 N89-12356
A vortex panel method for potential flows with applications to dynamics and control [AD-A197091] p 87 N89-12549
Voice recognition and artificial intelligence in an air traffic control environment [AD-A197219] p 91 N89-12559
Early jet engines and the transition from centrifugal to axial compressors: A case study in technological change [AD-A198775] p 177 N89-13430
Analysis of temperature and velocity microturbulence parameters from aircraft data and relationship to atmospheric refractive index structure [AD-A196542] p 196 N89-13854
Numerical grid generation and potential airfoil analysis and design [AD-A197972] p 154 N89-14219

- Developing criteria for sample sizes in jet engine analytical component inspections and the associated confidence levels [AD-A201508] p 401 N89-18488
Estimating aircraft airframe tooling cost: An alternative to DAPCA 3 [AD-A201506] p 360 N89-19226
R and M (Reliability and Maintainability) quality team concept and C-17 design at Douglas Aircraft Company: An R and M 2000 initiative case study [AD-A201574] p 361 N89-19228
Time periodic control of a multiblade helicopter p 406 N89-19312
Effect of riblets upon flow separation in a subsonic diffuser [AD-A203178] p 458 N89-20967
Numerical simulation of flow over iced airfoils [AD-A203291] p 458 N89-20969
Thin-layer Navier-Stokes solutions for a cranked delta wing [AD-A203292] p 459 N89-20970
Two-dimensional Navier-Stokes solution of the flow over a thick supercritical airfoil with strong shock-induced separation [AD-A203331] p 459 N89-20971
Aircraft tracking with dual TACAN [AD-A202647] p 466 N89-20980
Performance analysis of the fiber distributed data interface in the super cockpit audio world [AD-A202535] p 474 N89-20985
Preliminary design of a modular unmanned research vehicle. Volume 1: System design document [AD-A202785] p 474 N89-20987
A wind tunnel and computer investigation of the low speed aerodynamic characteristics of the prone escape system (PRESS) [AD-A202768] p 475 N89-20988
Response equivocation analysis for the smart stick controller [AD-A203148] p 475 N89-20989
Real-time display of time dependent data using a head-mounted display [AD-A203051] p 476 N89-20993
A helmet-mounted virtual environment display system [AD-A203055] p 476 N89-20994
Flight controller design with nonlinear aerodynamics, large parameter uncertainty and pilot compensation [AD-A202727] p 484 N89-21000
A digital rate controller for the control reconfigurable combat aircraft designed using quantitative feedback theory [AD-A203050] p 484 N89-21001
Development of a shock capturing code for use as a tool in designing high-work low aspect ratio turbines [AD-A202708] p 498 N89-21248
Application of the boundary element method to fatigue crack growth analysis [AD-A202565] p 498 N89-21270
Macrocrack-multiple defect interaction considering elastic, plastic and viscoplastic effects [AD-A203186] p 498 N89-21282
Selection of a frequency sensitive QFT (Quantitative Feedback Theory) weighting matrix using the method of specified outputs [AD-A202692] p 501 N89-21592
Multivariable control law design for the Control Reconfigurable Combat Aircraft (CRCA) [AD-A202697] p 540 N89-21803
The effects of incidence angle and free stream turbulence on the performance of a variable geometry two-dimensional compressor cascade at high Reynolds numbers [AD-A202650] p 557 N89-22052
Navier-Stokes solution for a NACA 0012 airfoil with mass flux (fan) [AD-A205771] p 593 N89-23424
Investigation of the flowfield created by the interaction of a sonic jet and a co-flowing supersonic stream [AD-A205823] p 593 N89-23425
Ejector effects on a supersonic nozzle at low altitude and Mach number [AD-A206049] p 594 N89-23427
Numerical study of the influence of leading and trailing edge flaps on the performance of airfoils [AD-A206138] p 594 N89-23428
Development of the extended kalman filter for the advanced Completely Integrated Reference Instrumentation System (CIRIS) [AD-A206083] p 601 N89-23443
Preliminary design of a modular unmanned research vehicle. Volume 2: Subsystem technical development design study [AD-A205678] p 607 N89-23454
A methodology for determining the survivability of fixed-wing aircraft against small arms [AD-A205730] p 607 N89-23455

- Flight control system for the CRCA (Control Reconfigurable Combat Aircraft) using a command generator tracker with PI (Proportional-Plus-Integral) feedback and Kalman filter, volume 1 [AD-A205723] p 616 N89-23473
Control design of an unstable non-minimum phase aircraft subject to control surface saturation [AD-A206024] p 616 N89-23475
Multivariable flight control design with parameter uncertainty for the AFTI/F-16 [AD-A206088] p 616 N89-23476
A demonstration of the method of stochastic finite element analysis [AD-A206135] p 630 N89-24127
Use of Navier-Stokes methods to predict circulation control airfoil performance [AD-A206242] p 595 N89-24270
Water tunnel investigation of the vortex dynamics of periodically pitched wings [AD-A206359] p 595 N89-24271
Flight control system for the CRCA (Control Reconfigurable Combat Aircraft) using a command generator tracker with PI (Plus Integral) feedback and Kalman filter, volume 2 [AD-A206202] p 617 N89-24325
Glider ground effect investigation [AD-A209152] p 821 N89-28490
Wake dissipation and total pressure loss in a two-dimensional compressor cascade with crenulated trailing edges [AD-A209176] p 864 N89-28755
- Air Force Materials Lab., Wright-Patterson AFB, OH.**
Technical evaluation report p 548 N89-22655
- Air Force Occupational and Environmental Health Lab., Brooks AFB, TX.**
Contamination of the exterior of a C-130E aircraft used for aerial spray, 907 TAG, Rickenbacker ANGB, OH [AD-A20430] p 474 N89-20984
- Air Force Systems Command, Wright-Patterson AFB, OH.**
Aviation and space news [AD-A197702] p 62 N89-11693
MPC-75 feeder civil aircraft [AD-A200907] p 317 N89-17594
Efforts toward the validation of a computational fluid dynamics code for analysis of internal aerodynamics p 423 N89-18643
Structural mechanics: Contemporary state and prospects for development (selected portions) [AD-A198766] p 497 N89-20498
Fly, great sea eagle [AD-A203979] p 530 N89-21789
Acta Aeronautica et Astronautica Sinica (selected articles) [AD-A205128] p 508 N89-22570
Visiting China's aerodynamics research and development center [AD-A203980] p 543 N89-22615
Technology of aircraft construction (selected chapters) [AD-A199946] p 569 N89-24261

FOREIGN TECHNOLOGY INDEX

AERONAUTICAL ENGINEERING / A Continuing Bibliography
1989 Cumulative Index

February 1990

Typical Foreign Technology Index Listing

Listings in this index are arranged alphabetically by country of intellectual origin. The title of the document is used to provide a brief description of the subject matter. The page number and the accession number are included in each entry to assist the user in locating the citation in the abstract section. If applicable, a report number is also included as an aid in identifying the document.

A

- ALGERIA**
Numerical study of turbulence model in a supersonic nozzle p 515 A89-39349
- ARGENTINA**
Transverse vibrations of a trapezoidal cantilever plate of variable thickness p 622 A89-40914
- AUSTRALIA**
The Australian Aviation Satellite System
[SAE PAPER 872420] p 24 A89-10642
Military aerospace technical development in Australia
[SAE PAPER 872426] p 1 A89-10646
Surveillance - High-technology fit-out for the Nomad aircraft
[SAE PAPER 872428] p 32 A89-10647
Introduction of the Hornet - A success story
[SAE PAPER 872436] p 27 A89-10653
A world leader in engineering and maintenance
[SAE PAPER 872444] p 1 A89-10657
Aeroelasticity past, present and future
[SAE PAPER 872449] p 19 A89-10662
Modern techniques for the control of RPV's
[SAE PAPER 872457] p 39 A89-10669
Fatigue testing of full-scale all-composite aircraft wings
[SAE PAPER 872459] p 48 A89-10671
Heat transfer and interferometric study of the flow over a rearward facing step in hypersonic high enthalpy stream p 64 A89-12887
Fatigue life improvement of thick sections by hole cold expansion p 118 A89-13561
Validation of a mathematical model of the Sea King Mk50 helicopter using flight trials data p 230 A89-23322
Comparison with flight data of hover performance using various rotor wake models p 230 A89-23323
Thermodynamics and wave processes in high Mach number propulsive ducts
[AIAA PAPER 89-0261] p 278 A89-25219

- Design of an all boron/epoxy doubler reinforcement for the F-111C wing pivot fitting - Structural aspects p 313 A89-27925
- Reliable information from engine performance monitoring
[SAE PAPER 881444] p 356 A89-28215
Controller reduction methods maintaining performance and robustness p 429 A89-28595
Sensitivity of fatigue crack growth prediction (using Wheeler retardation) to data representation p 379 A89-30539
Helicopter gear box condition monitoring for Australian Navy p 393 A89-30989
Computational fluid dynamics; Proceedings of the International Symposium, Sydney, Australia, Aug. 23-27, 1987 p 420 A89-31301
AE load-cycle dependence applied to monitoring fatigue crack growth under complex loading conditions p 420 A89-31599
Mathematical research at the Aeronautical Research Laboratories 1939-1980 p 437 A89-32982
Thin aerofoils with high-incidence flaps or blunt trailing edges p 445 A89-34749
Shock standoff from blunt cones in high-enthalpy nonequilibrium nitrogen flow p 570 A89-40913
Prediction of aircraft spin recovery
[AIAA PAPER 89-3363] p 780 A89-49067
Void minimization in adhesive joints p 802 A89-50141
Comparative durability of six coating systems on first-stage gas turbine blades in the engines of a long-range maritime patrol aircraft p 858 A89-54255
Australian hypersonic facilities p 854 A89-54349
A potential theory for the steady separated flow about an aerofoil section
[ARL-AERO-R-176] p 13 A89-10005
Contamination of environmental control systems in Hercules aircraft
[MRL-R-1116] p 29 A89-10040
Shock tunnel studies of scramjet phenomena
[NASA-CR-181721] p 38 A89-10045
Non-linear aerodynamic characteristics obtained from the analysis of flight-data
[AR-004-571] p 18 A89-10866
Some statistical aspects of attrition studies
[AD-A196865] p 30 A89-10891
Design of a new contraction for the ARL low speed wind tunnel
[ARL-AERO-R-171] p 116 A89-11755
Expansion tube test time predictions
[NASA-CR-181722] p 116 A89-11756
Engines for Mini-RPV XM-1A
[AD-A198336] p 178 A89-14236
Gas path analysis and engine performance monitoring in a Chinook helicopter p 327 A89-16802
An examination of the fatigue meter records from the RAAF (Royal Australian Air Force) caribou fleet
[AD-A201074] p 395 A89-19290
Description of a simple rotor test rig and preliminary wake studies
[AD-A204089] p 541 A89-21808
Single channel test controllers
[AD-A204088] p 541 A89-22611
Modelling aircraft dynamics
[AD-A204086] p 607 A89-23449
Flight testing of the Southern Cross replica aircraft
[AD-A205303] p 607 A89-23451
Compacted-snow runways: Guidelines for their design and construction in Antarctica
[AD-A206910] p 794 A89-27677
Comparison of flow-visualised vortices with computed geometry over thin delta wings
[AD-A209083] p 821 A89-28489
Aerodynamic model tests of exhaust augmentors for F/A-18 engine run-up facility at RAAF Williamtown
[AD-A208110] p 841 A89-28518
Stresses and strains in a cold-worked annulus
[AR-005-548] p 866 A89-28871
Flutter calculations for a model wing using the MSC NASTRAN structural analysis program
[AD-A209244] p 824 A89-29318

- Aircraft trajectory generation: A literature review
[AR-005-609] p 835 A89-29335
Incorporation of vortex line and vortex ring hover wake models into a comprehensive rotorcraft analysis code
[AD-A208036] p 835 A89-29338
A user's manual for the ARL mathematical model of the Sea King Mk-50 helicopter. Part 1: Basic use
[AD-A208058] p 835 A89-29339
A user's manual for the ARL mathematical model of the Sea King Mk-50 helicopter. Part 2: Use with ARL flight data
[AD-A208059] p 836 A89-29340
Identification of an adequate model for collective response dynamics of a Sea King helicopter in hover
[AD-A208060] p 836 A89-29341
A modified least squares estimator for gas turbine identification
[AD-A207911] p 842 A89-29348
- AUSTRIA**
Spray formed Waspaloy for disc forgings p 487 A89-33463

B

- BELGIUM**
Reliability and maintainability in modern avionics equipment - A user's point of view p 61 A89-13671
Comparison of stepped-sine and broad band excitation to an aircraft frame p 99 A89-15643
Infrared thermography in blowdown and intermittent hypersonic facilities
[AIAA PAPER 89-0042] p 334 A89-25036

CONTRACT NUMBER INDEX

AERONAUTICAL ENGINEERING / A Continuing Bibliography
1989 Cumulative Index

February 1990

Typical Contract Number Index Listing

Listings in this index are arranged alphanumerically by contract number. Under each contract number, the accession numbers denoting documents that have been produced as a result of research done under the contract are arranged in ascending order with the AIAA accession numbers appearing first. The accession number denotes the number by which the citation is identified in the abstract section. Preceding the accession number is the page number on which the citation may be found.

REPORT NUMBER INDEX

AERONAUTICAL ENGINEERING / A Continuing Bibliography
1989 Cumulative Index

February 1990

Typical Report Number Index Listing

Listings in this index are arranged alphanumerically by report number. The page number indicates the page on which the citation is located. The accession number denotes the number by which the citation is identified. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

ACCESSION NUMBER INDEX

AERONAUTICAL ENGINEERING / A Continuing Bibliography
1989 Cumulative Index

February 1990

Typical Accession Number Index Listing

Listings in this index are arranged alphanumerically by accession number. The page number listed to the right indicates the page on which the citation is located. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

SPECIAL NOTICE

The abstract sections of the monthly supplements of *Aeronautical Engineering* can be bound separately. Individual abstracts can be located readily by means of the page numbers given at each entry, e.g., p 373 N89-18649. To assist the user in binding Supplements SP-7037(236) through SP-7037(247), a title page is included in this Cumulative Index.

AERONAUTICAL ENGINEERING

A CONTINUING BIBLIOGRAPHY

Abstracts
January — December 1989

1. Report No. NASA SP-7037 (248)		2. Government Accession No.		3. Recipient's Catalog No.	
4. Title and Subtitle AERONAUTICAL ENGINEERING A Cumulative Index to the 1989 Issues				5. Report Date February 1990	
				6. Performing Organization Code	
7. Author(s)				8. Performing Organization Report No.	
				10. Work Unit No.	
9. Performing Organization Name and Address National Aeronautics and Space Administration Washington, DC 20546				11. Contract or Grant No.	
				13. Type of Report and Period Covered	
12. Sponsoring Agency Name and Address				14. Sponsoring Agency Code	
15. Supplementary Notes					
16. Abstract This bibliography is a cumulative index to the abstracts contained in NASA SP-7037 (236) through NASA SP-7037 (247) of Aeronautical Engineering: A Continuing Bibliography. NASA SP-7037 and its supplements have been compiled through the cooperative efforts of the American Institute of Aeronautics and Astronautics (AIAA) and the National Aeronautics and Space Administration (NASA). This cumulative index includes subject, personal author, corporate source, foreign technology, contract number, report number, and accession number indexes.					
17. Key Words (Suggested by Authors(s)) Aerodynamics Aeronautical Engineering Aeronautics Bibliographies				18. Distribution Statement Unclassified - Unlimited	
19. Security Classif. (of this report) Unclassified		20. Security Classif. (of this page) Unclassified		21. No. of Pages 530	
				22. Price * A23 HC
